

Mobile Ordering for your SwiftPOS System

IPADS

WINDOWS TABLETS

IPODs

ANDROID TABLETS

IPHONE

With the advances in wireless technology, it is now possible to install hand held ordering systems in indoor/outdoor restaurants without fear of signal dropouts and lost orders.

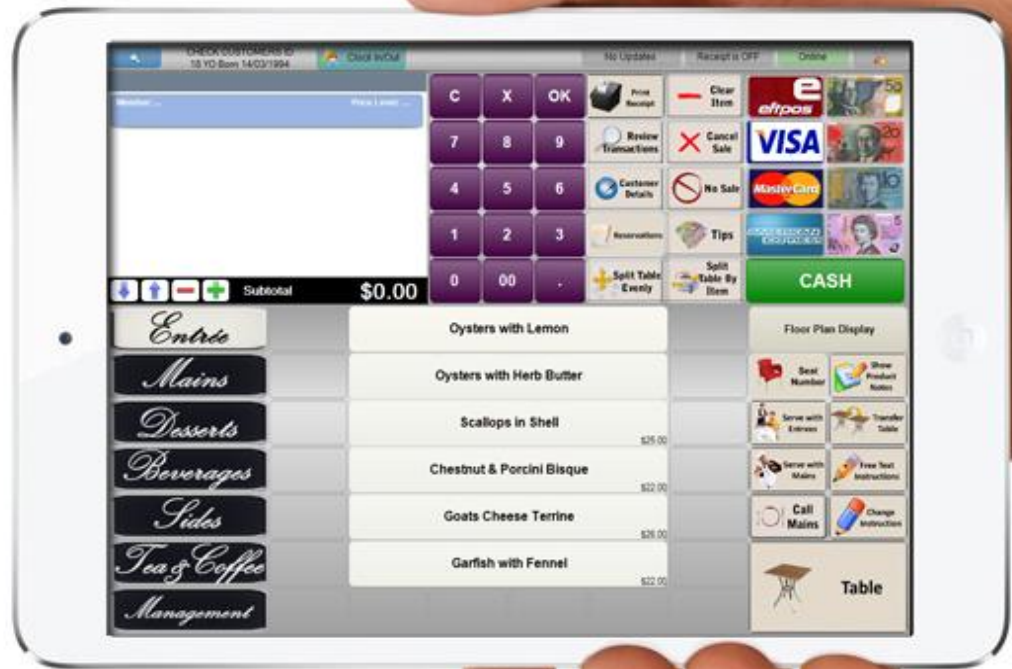

The SwiftPOS Mobile software will move to a different antennae to increase signal strength automatically when required.

Table orders at the Point of Sale will automatically print in the kitchen and/or bars for fast table service.

Wireless Technology allows your Staff to better look after your Customers.

Kitchen/Bar/Receipt Printing allows orders to be processed quickly.

Easy to navigate display - find and order products quickly and save the correct order to the correct table with accuracy.

Reduce ordering times by directly entering orders at the table. To be able to take the orders directly at the table and know that they are printing in the bar or kitchen allows Waiter staff to quickly move onto the next table to provide fast, friendly service. Kitchen runners can deliver the food directly to the seat.

Reduce ordering errors because of staff are automatically prompted for cooking instructions, sauces and condiments that can change with each meal type. With reliable Windows Mobile devices that have heavy duty battery packs, you

Print to the kitchen straight from the mobile device table!
